

# STREAMLINED PACKAGED CONCRETE BATCHING

For packaged concrete plants, efficiency thrives when you work with sophisticated controls. Egan Company's *KFBatch concrete automation system* provides control and data processing to automatically supply quality concrete and mortar mixes for bulk and small bag packaging.

## *Color and Special Ingredients*

Precision automatic dispensing and/or interlocked hand-add control of high value materials.

## *Added Controls*

Automate related features such as dryers, dust collectors, cement aeration, and material handling.

## *Bag Production Tracking*

View live tracking and easily pull reports for small and bulk bag production.

## *Repeatable Consistency*

All settings for coordinated scaling, mixing, and material handling are saved in product mix designs to be loaded and reproduced.

### ADDITIONAL FEATURES:

Small bag check weight recording (and weight alarms)

Downtime recording and reporting

Overall Equipment Effectiveness (OEE) and production display

Data interface to Material Requirements Planning (MRP) system

### KFBATCH PRODUCTS

offer engineered control and data processing systems for operation of concrete products batch plants. With our sweeping range of features geared toward quality and control, KFBatch covers all the bases for your new or existing concrete plant.

*Building on Promises Kept*

*An Affirmative Action/Equal Opportunity Employer*

### Data Storage

A comprehensive batch history saves to an SQL database.

### Reporting

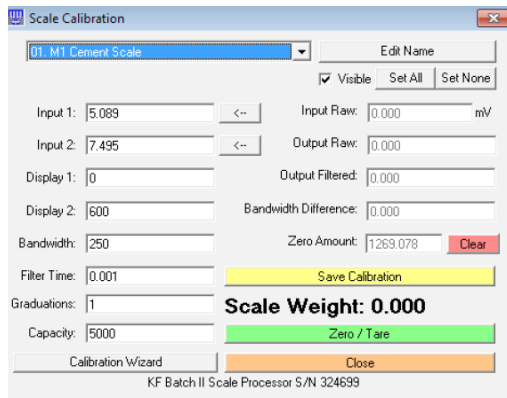

In-depth information can be pulled via our web-based reporting feature to assist production management.

### Mix Designs

Easily create, edit and select unlimited comprehensive mix designs.

### Scale Calibration

Precisely calibrate scales at each control station.

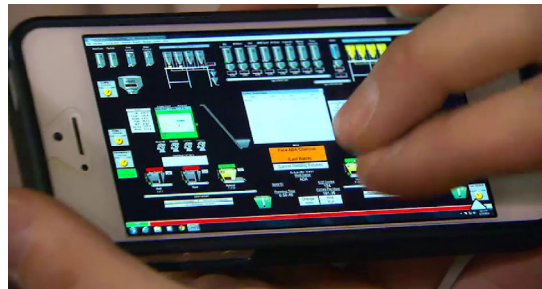

Scale Calibration

### Inventory Management

Easily track material inventory with automatic deduction feedback from dispensing devices and additions by hand-entry.

### Email and Mobile Alert System

Receive automatic texts and emails in case of system alarms.

View reports and system alarms on your mobile phone.

### Event Logging

Track all activity including setting changes, time stamps, and users.

### User Security and Tracking

Secure administrative access to system editing and mix designs for only qualified operators or supervisors.

**EGAN COMPANY** is a specialty contractor in the Midwest with multi-discipline expertise in mechanical, electrical, engineering & design, curtainwall/glazing/planel systems (InterClad), millwrights, fabrication, building systems, controls & system integration, and service.

**SAFETY** is a significant component of all Egan Company projects, and we invest resources into keeping it that way. In fact, we have been recognized as one of America's Safest Companies.
